THANK YOU!

Thank you for taking the time to complete the child care survey. The survey results will be used to provide Hospital officials a picture of the Hospital & Clinic employees' thoughts, experiences and needs regarding child care services.

These survey results will assist Hospital officials to determine the next steps to take to address employee child care services to create solutions to meet this need with our employees. Additionally, the survey results may determine that no next steps are needed or no next steps can be taken due to limitations or regulations.
